Integration with Existing A/V Workflows	✓	✓

**Live Closed Caption services are billed separately.

Service Highlights

Reliability with Dedicated Hardware

Enterprise-grade hardware encoders are a best practice when streaming town halls, all-hands meetings or investor webcasts with absolute confidence. Our teams use best-in-class hardware units from either AWS Elemental or Haivision to ensure success.

Redundancy for Critical Events

Critical event content should be streamed with core infrastructure redundancies in place to safeguard any failures that may occur during events, ensuring no stream downtime. Premium encoding services include dual-node encoding for critical events.

Secure Streaming with Encrypted RTMP

For companies requiring secure ingest between encoders and Kaltura's cloud, the encoding service supports output over RTMPS (encrypted RTMP) to ensure security and compliance of live content.
